Nurture Student Employability & Engagement

The career development platform for institutions requiring a highly flexible and configurable solution to improve student retention rates and graduate outcomes

ABOUT CAREERHUB

Symplicity CareerHub is an institution wide career development and engagement platform for universities and colleges. Its highly configurable components and workflows empower teams to accelerate career development and student employability.

Globally, over 100 universities depend on CareerHub as their central employability and student engagement hub. The platform is a one-stop-shop for managing on campus and off campus appointments and events, skills development, experiences and opportunities, activities, job vacancies and your employability strategy.

CareerHub enables you to digitalise your service offering campus wide, collaborate through scalable utilisation across multiple teams, and provide personalised services to your students 24/7.

Benefits of CareerHub

Enables universities to manage and report on everything a careers service requires to operate within one single platform, across the whole university

Allows students to access key services from a single platform for a consistent experience

Fosters campus partnerships between centralised and distributed services though a highly-customisable hub

Strengthens collaboration between departments and allows you to keep content private or share collaboratively with others

Develop cross-departmental processes to monitor, manage and report on all student activity

Enables careers teams to tailor and highly customise their service delivery, aligned to the universities strategic plans

FEATURES

Fully tailored branding & custom URLs

Configurable interfaces
